

VERTMOUNT™ GROUNDING SYSTEMS for Vertical Hollow Shaft Motors

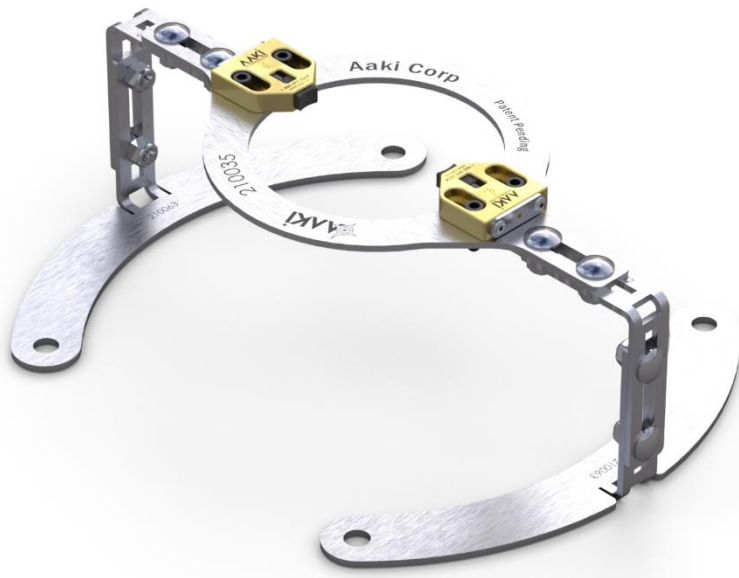

A simple, effective solution for protecting bearings on Vertical Hollow Shaft Motors

The VerTmount™ Grounding Bracket system takes out the effort and guesswork when mounting Aaki Motor Shaft Grounding modules on vertical hollow shaft motors. Simple to install, maintain and service.

- ***No drilling typically required!***
- Mounts under the motor top cap
- Easy to maintain and service
- Install on almost any motor
- Free from grease contamination
- Cut installation costs by up to 70%

The complete system includes:

- Two Standard Motor Shaft Grounding Modules
- Custom bracketry to allow for the installation on almost any motor configuration
- High performance braided ground strap for effective grounding to the frame
- All the required fasteners and hardware for a complete installation

Reduce installation time and costs by up to 70%
Sizes available to fit most motor configurations and horse powers
